### ISB to Commence "Qt Professional Services" in Early 2010

---

Tokyo - ISB Corporation ("ISB") announced today that it will commence professional services specialized in Qt, a cross-platform UI application framework released by Nokia Qt Development Framework, in early 2010.

"Qt" is software used for a number of various embedded devices available around the world as an open-source software cross-platform UI framework and was introduced to over 5,000 companies in 60 countries. A rapid increase in the number of Qt users is expected since the LGPL version added for Qt 4.5 released on March 3, 2009 allows you to use the rich UI framework for even proprietary development free of charge. Qt 4.5 LGPL version can be downloaded from the Qt portal site (<http://qt.nokia.com>).

ISB's "Qt Professional Services" including development/test services, technical consulting/support and Qt engineer training will be provided to mobile phones and embedded developers for a fee. ISB has concluded the VAR agreement with Nokia Development Frameworks who developed "Qt" and will provide high quality of the professional services.

ISB has grown along with the progress of mobile computing and continues to provide engineering services and solutions in all areas of mobile.
