
ISB Signs Software License and Distribution Agreement with VirtualLogix

Tokyo - August 25, 2010: ISB Corporation ("ISB") announced today that it has entered into a software license and distribution agreement with VirtualLogix®, Inc. ("VirtualLogix"), a leader in virtualization technology in the United States. By this, ISB receives a license to VirtualLogix VLX™ virtualization software which enables simultaneous operation of a high-level operating system and a Real-Time Operating System (RTOS).

"We are pleased to work with VirtualLogix to offer the VLX software to bring devices to market cheaper and faster with providing the engineering service and support", said Itsuo Wakao, President, ISB. "The VLX brings the many benefits to embedded system manufacturers and OEMs in Japan."

"We are excited to work with an industry leader like ISB as they accelerate the adoption of virtualized mobile and embedded devices in Japan," said Glenda Dorchak, vice chairman and CEO at VirtualLogix. "ISB further validates the value that VLX delivers in advancing the development of products based on Android and other operating systems."

About ISB Corporation

ISB Corporation was established in 1970 as an information service company dealing primarily with general-purpose and business system development and system operations. The company turned its attention to the expansibility of mobile communication fields as soon as they appeared, setting mobile communication as the pillar of the businesses; it has contributed to the development of the current mobile computing making the best use of its knowledge and the experience accumulated over the long period of time. While offering a wide range of engineering services and solutions in mobile fields, ISB aims to become customers' IT solution partner, who can meet their true IT needs by providing integrated solutions that fuse its core technologies and the service know-how the company accumulated in each field of distribution/production, financial, health care/nursing care, government, municipalities, broadcasting, outsourcing, etc. More information about ISB can be found at ISB's website (www.isb.co.jp/english/).

About VirtualLogix, Inc.

VirtualLogix®, Inc. is the global leader in Real-Time Virtualization™ software technology for mobile products including wireless handsets. VirtualLogix's flagship product, VLX™, enables multiple operating system environments to run concurrently on shared hardware for both Intel and ARM-based solutions. VLX delivers isolation technology and virtualization that improves power management, performance, application independence, fault tolerance and security options, which can be tailored to address specific market requirements. This enables developers to reduce R&D costs, accelerate adoption of the latest silicon solutions, improve time to market and deliver improved mobile device security. VirtualLogix is accelerating the availability and innovation in the next generation of wireless devices. For more information, go to www.virtuallogix.com or www.vlx.com.

VirtualLogix Inc. is headquartered in Santa Clara, California with development operations in France and business offices globally.
